A Revolution in Traction Hoist Technology

Power Climber's **PC3 Relevation** is the **only BATTERY-POWERED** traction hoist on the market. With a 1000 lb capacity and personnel rating, the PC3 Relevation lets you work at elevation safely, reliably, anywhere you need it.

Reliable
chargeable
ready to **Go**

Benefits

- › No power cables
- › No need to call an electrician or rent a generator
- › No loss of productivity due to unreliable power
- › Minimized service calls and reduced maintenance

Who Will Benefit?

Jobsites...

- › with unstable or inadequate power
- › with no available power supply
- › with uncommon power (110V, 400V) or requiring a certified electrician to use
- › where power cables are inconvenient, difficult to manage, or not allowed by the owner

Hoist Features

Enhanced Capabilities

- › Soft start & soft stop
- › Quiet operation
- › Best-in-class operating temperature range
- › Consistent motor speeds regardless of battery charge level
- › Display for battery charge and hour meter

Robust & Durable Construction

- › Cast control box, IP64-rated
- › Protection plate over motor
- › Proven nylon-reinforced polymer traction cover

Ease of Use

- › Identical platform compatibility as PC3
- › Overload set at 125% rated load
- › Options: top limit switch, slack rope safety (for secondary wire rope)

Hoist Controls

Charger

Battery

Battery Features
